Swiss Air Traffic in the Year 1962

On the basis of the data contained in the Swiss air traffic statistics gathered for the year 1962, there has been a further increase of traffic compared to the preceding year. This relates to passenger traffic, as well as goods traffic.

The following results show the growth in scheduled traffic at Swiss airports, with the exception of direct transit:

	Zurich	Geneva	Basle	Berne
1. Passengers	1 507 484	916 039	138 815	9 085
Rise compared to preceding year . . .	163 056	76 627	289	772
In percent	12	9	0.2	9
2. Cargo and Mail in tonnes	24 992	10 785	4 247	61
Rise compared to preceding year . . .	4 155	2 730	1 851	8
In percent	20	34	77	15

Since the coming into force of the summer timetable, Channel Air Bridge operates one service each to Geneva and to Basle. These flights serve the transportation of cars. From their operation results the heavy advance in goods traffic at Geneva and Basle.

At the four airports together there is an average of 238 daily movements, i. e. 238 departures and landings of scheduled flights compared to 227 in the year 1961; this equals an increase of 5%. The number of cities operated to direct was 97 for Zurich, 56 for Geneva and 19 for Basle (key-date: 1st July).

If we regard the traffic at Zurich, Geneva and Basle airports as a whole, it shows in Western Europe a remarkable volume. Unfortunately the annual results of the airports of Western Europe for 1962 are not as yet available. They cannot, therefore, be compared with those of the Swiss airports. The total of passengers embarking and disembarking at our airports which are relatively close to each other, was in the last years only exceeded by that of the airports of London and Paris.

Swissair records on the total of all legs of its network the following traffic increase: passengers by 208 500 to a round 1 648 400, cargo and mail by 2 109 tonnes to 28 121 tonnes. The capacity rose in the year 1962 by 27%, from 299 million tkm to 380 million tkm. The average load factor was 51.9% and the average regularity 97.3%. Not taking into account the transit traffic of foreign airlines, Swissair shares in the traffic from Switzerland to foreign countries and vice versa 57% for passengers and 51% for cargo and mail.

The Swissair network was further extended this year. We may mention here the opening of the lines Zurich-Montreal-Chicago and Zurich-Geneva-Lagos-Accra, as also the extension of one South America line from Buenos Aires to Santiago de Chile. Swissair's network touched 38 countries and corresponded to a total length of 129 383 km compared with 108 820 km in the preceding year. The number of airports regularly served from Switzerland was 54. (Key-date for these data is 1st July.)

In the year 1962 Swissair was able to complete the conversion of its long-distance routes to operation with jet aircraft.

On their flights to Switzerland and through Switzerland, the following rise in traffic can be established for the *foreign airlines*: passengers by a round 86 000 to 1 294 000 and cargo and mail by 8 309 tonnes to 44 539 tonnes. The regularity was 97.2% on the average and the utilization of the tkm 57.1%.

Channel Air Bridge, London, Ghana Airways, Accra, and the Martin's Air Charter, Schiphol, Holland, have started scheduled services to Switzerland. In the course of the year under review 36 foreign airlines operated regularly to our country. To these have to be added eight foreign airlines, licensed for the operation of seasonal lines.

As it did for scheduled traffic, the airport of Zurich recorded also for charter traffic the highest number of passengers, namely 73 739 or 45% of the total of the four airports. At the end of the year 49 Swiss companies held permits for the operation of occasional commercial flights. 19 of these companies are authorized to operate flights to foreign countries.

The production in charter traffic was as follows:

1. Swiss carriers:

189 235 passengers, of whom 140 248 on commercial flights, 47 279 on sightseeing flights and 1 708 on other special flights against payment, as well as 1 918 tonnes of cargo.

2. Foreign carriers:

80 649 passengers on commercial flights and 1 844 tonnes of cargo.

The increase in passenger traffic of Swiss and foreign airlines amounted to 5.7% compared to the year 1961 and the share in the charter traffic in the entire commercial traffic was as follows: 8.4% for passengers and 5.8% for cargo, compared to 8.8% and 10.8% in the preceding year.

Berne, 22nd March 1963

4. Swiss Route Pattern

A. Total length on 1st July, 1962 (unduplicated route kilometres):
 Services provided by Swissair and services with participation of Swissair 129 383 km
 Services to and through Switzerland exclusively provided by foreign air carriers 271 584 km
Total 400 967 km

B. Total number of direct connections with other cities:
 from Zurich 97
 from Geneva 56
 from Basle 19

◀ Note: Non-revenue flights are not included.
