Swiss Air Traffic in the Year 1963

The Swiss airports, with the exception of Berne, continued in 1963 to show an increase in traffic. This relates to passenger traffic as well as goods and mail traffic.

The following results show the growth in scheduled traffic at Swiss airports (direct transit not included):

	Zurich	Geneva	Basle	Berne
1. Passengers	1 666 821	1 017 259	162 842	8840
Rise or decrease compared				
to preceding year	+159 337	+101 220	+24 027	—245
In percent	+ 11	+ 11	+ 17	— 3
Daily average	4 567	2 787	446	63
2. Cargo and mail in tonnes .	30 249	14 551	5 712	53
Rise or decrease compared				
to preceding year	+ 5 256	+ 3 767	+ 1 466	— 8
In percent	+ 21	+ 35	+ 35	— 13

The figures relate to passengers embarked and disembarked as well as to goods loaded and unloaded.

Goods traffic heavily advanced at Geneva and Basle. This increase is mainly due to the fact that British United Air Ferries Ltd extended their transportation of cars to 12 months instead of 9 months in 1962. The frequency of their flights has increased too.

The passenger high was reached at Zurich in September (179 422), at Geneva (105 505) and Berne (2121) in July and at Basle (28 226) in August.

The number of cities served directly was 100 for Zurich, 63 for Geneva and 18 for Basle (key-date 1st July).

If we regard the traffic at Zurich, Geneva and Basle as a whole, 49 %, i. e. 46 485 of all movements (94 219) had been operated by jets; at Zurich 50 %, at Geneva 61 % and at Basle 9 %.

Swissair records on the total of all legs of its network the following traffic increase: passengers by 131 629 to 1 780 048 (+ 8%), cargo and mail by 3794 tonnes to 31 915 tonnes (+ 13 %). The capacity rose in the year 1963 by 38 million tkm (10 %) to 418 million tkm. The average load factor was 51,8 % and the punctuality 94,1 %. For the first time Swissair has flown more than 100 000 passengers across the North Atlantic. The company's share in the traffic from Switzerland

to foreign countries and vice versa was 56 % for passengers and 46 % for cargo and mail.

The Swissair network was further extended this year by the opening of a service to Alger. Two Coronado are operated by Ghana Airways on a wet-lease basis. Swissair's network touched 38 countries and corresponded to a total length of 130 661 km. The number of airports regularly served from Switzerland was 54 (key-date for these data is 1st July).

Unfortunately we have also to record one accident involving fatalities. A Caravelle crashed at Dürrenäsch after take-off.

On their flights to Switzerland and through Switzerland, the following rise in traffic can be established for the *foreign airlines*: passengers by 168 730 to a round 1 462 700 (+ 13 %), cargo and mail by 6544 tonnes to 51 083 tonnes (+ 15 %). The tkm load factor was 56,8 % and the punctuality 92,6 %. Transportes Aereos Portugueses, Luxair and temporarily also Airnautic, have started scheduled services to Switzerland. Air Inter opened a service between Paris and Basle-Mulhouse. The following companies suspended their services to and from Switzerland: Finnair, Iraqi Airways, Martin's Air Charter, Persian Air Services, Trans-Mediterranean Airways. In 1963 35 foreign airlines operated regularly to our country. In addition to these, seven foreign airlines have been licensed for the operation of seasonal services.

The production in charter traffic was as follows:

1. Swiss carriers:
 - 222 642 passengers, of whom 173 935 on commercial flights, 45 478 on sight-seeing flights and 3229 on other special flights against payment, as well as 2989 tonnes of cargo.
2. Foreign carriers:
 - 78 112 passengers on commercial flights and 2260 tonnes of cargo.

As it did for scheduled traffic, the airport of Zurich recorded also for charter traffic the highest number of passengers, namely 85 658 or 43 % of the total of the four airports.

The increase in passenger traffic of Swiss and foreign airlines was 30 870 or 11,4 % compared to 5,7 % in 1962. The share of the charter traffic was as follows: 8,5 % for passengers and 6,9 % for cargo, compared to 8,4 % and 5,8 % in the preceding year.

4. Swiss Route Pattern

A. Total length on 1st July, 1963 (unduplicated route kilometres):

Services provided by Swissair and services with participation of Swissair	130 661 km
Services to and through Switzerland exclusively provided by foreign air carriers	297 736 km
Total	428 397 km

B. Total number of direct connections with other cities:

from Zurich	100
from Geneva	63
from Basle	18

Note: Non-revenue flights are not included.

5. Accidents to Aircraft registered in Switzerland

	Commercial air traffic				Private aircraft		Gliders		Balloons	
	Scheduled air services		Non-scheduled air traffic		1962	1963	1962	1963	1962	1963
